

COMPUTER STUDIES FORM 5 2009-2010

Textbook: *Computer Studies* published by Merlin Library

TERM	Chapter Number	Topic	Description
1	Chp 19	System Analysis <i>Revision in Practical</i>	The Steps involved in the system analysis.
1	Chp 22	Design Algorithms and Flow Charts <i>Revision in Practical</i>	A Flow chart is needed to see how a program will work or how it is working. Special symbols are used to describe different sections of the code.
1	Chp 17	Operating Systems and Networks	The role of the OS and the different types of OSs available and their particular role.
1	Chp 25	Internet	Continue and conclude Chapter 7 Data Communication and Networks.
2	Chp 24	Computer Applications & Jobs	The use of some application in the working environment.
2	Revision	Personal Notes	Using some extra notes (beside the book) we will revise the most important topics done during the previous years.
2	Revision	Past Papers	Using some past papers we will work out some of the questions. TESTS.

During this year we finish the last projects that are needed for the Sec Level. All 3 projects together amount to 15% of the SEC mark. The practical sessions will be dedicated to preparing the students to build these projects. All projects should be finished by *December*.

During this year we will be doing some past papers too. Buy the following past papers as early as possible: 2006, 2007, 2008, 2009.

Assessment scheme:

When	Criteria	Marks
Novemeber Test	Class test	50
November Assessment	Class work, homework, attitude, behaviour & participation during lessons	
Final Exam	Exam	100
Final Assessment	Project	10
	Attitude, behaviour & participation during lessons	10
